INTERNATIONAL JOURNAL OF CIRCUIT THEORY AND APPLICATIONS, VOL. 20, iii–vi (1992)

CONTENTS

Volume 20, Issue Nos 1–6

International Journal of
CIRCUIT THEORY AND APPLICATIONS

Issue No. 1, January–February 1992

Editorial i

Extension of a Driving-point and a Transfer Function to a Positive Real Two-port Matrix: G. O. Martens and R. Unbehauen 1

Global Properties of Continuous Piecewise Linear Vector Fields. Part II: Simplest Symmetric Case in $\mathbb{R}^2$: R. Lum and L. O. Chua 9

Low-passband-sensitivity Switched Capacitor Filters Using a Parallel Connection of Two Structurally Lossless Networks: C.-A. Gobet, S. K. Mitra and A. Petraglia 47

Transformation of the Transfer Function Variables of the Singular n-Dimensional Roesser Model: K. Gałkowski 63

Circuit Macromodels and Large-signal Behaviour of FET-input Operational Amplifiers: D. Golzio, S. Graffi, Zs. M. V.-Kovács and G. Masetti 75

LETTERS TO THE EDITOR

Zero Placement Technique for IIR Switched Capacitor Anti-aliasing Decimators: A. Baschirotto, R. Castello and F. Montechhi 87

Neural Network for Non-linear Programming with Linear Equality Constraints: S. Osowski . . 93

On the Steady State Analysis of Switched Mode Power Converters: C. K. Tse and K. M. Adams . 99

Issue No. 2, March–April 1992

A Collocation Algorithm for Calculating the Periodic Solutions of Non-linear Oscillators: A. Buonomo 107

A Method for the Investigation of High Order Two-frequency Asynchronous Oscillators: E. F. Calandra and A. M. Sommariva 117

Relaxation-based Computation of a Synchronous Sequential Circuit Stable State: M. Diouf and C.-H. Carlin 137

A Unified Framework for Gradient Algorithms Used for Filter Adaptation and Neural Network Training: S. Marcos, O. Macchi, C. Vignat, G. Dreyfus, L. Personnaz and P. Roussel-Ragot. . 159

Indexed or abstracted by Cambridge Scientific Abstracts, Current Contents, Engineering Index Inc., INSPEC, Mathematical Reviews, Science Citation Index, SCISEARCH Database, Zentralblatt für Mathematik

LETTERS TO THE EDITOR
Perfect Pairs of Trees in Graphs: L. Novak and A. M. Gibbons 201

A New Serial/Parallel Two's Complement Multiplier for VLSI Digital Signal Processing: G. P. Alexiou and N. Kanopoulos. 209

Issue No. 3, May–June 1992

Special Issue
Fundamental Methods in Computer-aided Circuit Design: Part 2

Guest Editors: P. Dewilde and S. M. Kang

Editorial 215

Scheduling Algorithms for Hierarchical Data Control Flow Graphs: M. Potkonjak and J. M. Rabaey 217

Foreground Memory Management in Data Path Synthesis: L. Stok and J. A. G. Jess 235

A Prototype Tool for the Design-oriented Symbolic Analysis of Analogue Circuits: F. Dorel and M. Declercq 257

Automation of the IC Layout of Continuous-time Transconductance-capacitor Filters: W. R. Daasch, M. Wedlake, R. Schaumann and P. Wu 267

A Fast, Single-layer, Area Router for Semi-custom Analogue Circuits: O. Buset, M. Declercq, F. Rahali and P. Vaucher 283

Trade-off Prediction and Circuit Performance Optimization Using a Second-order Model: X. Xiangming and R. Spence 299

Analysis of Switched Networks: D. Bedrosian and J. Vlach 309

SMOS: A Cad-compatible Statistician Model for Analogue MOS Integrated Circuit Simulation: C. Michael, C. Abel and M. Ismail 327

Issue No. 4, July–August 1992

Theory of Transmission Switches and its Application to Design of CMOS Digital Circuits: X. Wu . 349

Computer-aided Manipulation of Mason's Formula and its Applications: C.-H. Wang . . . 357

Transmission Line Analysis via Taylor Series: E. P. Semagina and O. I. Beznosova 371

Design Criteria for High-frequency *RC*-Active Sinusoidal Oscillators: A. Carlosena, P. A. Martinez and S. Porta 387

On Symbolic Dynamics of a Chaotic Second-order Digital Filter: Z. Galias and M. J. Ogorzałek . 401

On Algorithms in the Parallel Design of Logic and Layout of Circuits with Functional Blocks: P. Szolgay 411

Existence and Stability of Periodic Solutions in Weakly Non-linear Electrical Circuits via Averaging and Functional Analytical Methods: D. E. Ulmet 431

Issue No. 5, September–October 1992

Special Issue
Cellular Neural Networks
Guest Editors: J. Vandewalle and T. Roska

Guest Editorial: J. Vandewalle and T. Roska 449

THEORY
Discrete-time Cellular Neural Networks: H. Harrer and J. A. Nossek 453

Cellular Neural Networks with Non-linear and Delay-type Template Elements and Non-uniform Grids: T. Roska and L. O. Chua 469

Membrain: A Cellular Neural Network Model Based on a Vibrating Membrane: J. Henseler and P. J. Braspenning 483

On the Universe of Stable Cellular Neural Networks: L. O. Chua and C. W. Wu 497

A Path-following Method for Finding Multiple Equilibrium Points in Cellular Neural Networks: L. Vandenberghe and J. Vandewalle 519

Cellular Neural Networks: Theory and Circuit Design: J. A. Nossek, G. Seiler, T. Roska and L. O. Chua 533

VLSI IMPLEMENTATIONS
Design of High-speed, High-density CNNS in CMOS Technology: J. M. Cruz and L. O. Chua . 555

Programmable Analogue VLSI CNN Chip with Local Digital Logic: K. Halonen, V. Porra, T. Roska and L. Chua 573

Testability in Analogue Cellular Neural Networks: A. Rueda and J. L. Huertas 583

CNN DESIGN TOOLS
A Digital Multiprocessor Hardware Accelerator Board for Cellular Neural Networks: CNN-HAC: T. Roska, G. Bártfai, P. Szolgay, T. Szirányi, A. Radványi, T. Kozek, Zs. Ugray and Á. Zarándy. 589

APPLICATIONS
A CNN Handwritten Character Recognizer: H. Suzuki, T. Matsumoto and L. O. Chua 601

Detecting Moving and Standing Objects using Cellular Neural Networks: T. Roska, T. Boros, A. Radványi, P. Thiran and L. O. Chua 613

Cellular Neural Network Design for Solving Specific Image-processing Problems: K. Ślot . . 629

Issue No. 6, November–December 1992

Very-high-output-impedance Cascode Current Sources/Current Mirrors/Transresistance Stages and their Applications: S. R. Zarabadi and M. Ismail 639

Approximate Solutions to a Dynamic Worst-case Tolerance Analysis Problem: L. V. Kolev . . 649

On the Design of 2D IIR Digital Filters using Penalty Optimization Techniques: N. Papamarkos . 663

LETTERS TO THE EDITOR

A Single-op-amp Realization of a General Biquadratic Transfer Function: M. Hribšek . . . 677

Perfect Pairs of Trees Associated with a Prescribed Tree: An Algorithic Approach: L. Novak and A. Gibbons 681

On the Definitions of Stochastic, Deterministic and Near-stochastic Systems: I. Rizkin . . . 689

Realization of *n*th-order Transfer Functions using Current Conveyors: F. Anday and E. O. Gunes . 693

Author Index 697
